CAREER OBJECTIVE Motivated and detail-oriented Full Stack Web Developer with a strong command of the MERN Stack, front-end frameworks, and modern UI libraries. As a final-year BCA student, I am eager to leverage my technical skills to build scalable applications and contribute to a dynamic, tech-driven organization.

EDUCATION Bachelor of Computer Applications (BCA) Indira Gandhi National Open University (IGNOU) | *Status: Pursuing (Final Year)*

TECHNICAL SKILLS

- **Frontend:** HTML, CSS, JavaScript, TypeScript, React.js, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js
- **Database:** MongoDB
- **Deployment & Hosting:** Vercel, Render
- **Version Control & Tools:** Git, GitHub, Postman, VS Code

PROJECTS

1. BizzFlow – SaaS Billing & Automation Platform (MERN Stack + Twilio API) [\[Live Demo\]](#) | [\[GitHub Code\]](#)

- **Architected** a full-stack SaaS workspace using React.js, Node.js, and MongoDB to streamline tenant management and automated invoice tracking.
- **Integrated** Google Gemini Vision AI to engineer a "Smart Receipt Scanner," enabling automated data extraction from images for instant invoice generation.
- **Developed** a multi-channel communication engine utilizing Twilio API for automated WhatsApp delivery, integrated email services, and 1-click PDF generation.
- **Optimized** application performance and scalability by implementing backend data pagination and a highly interactive UI using Tailwind CSS and Framer Motion.

2. AI Mock Interview Platform (MERN Stack + AI Integration) [Live Demo](#) | [GitHub Code](#)

- Engineered an AI-powered mock interview web application using React.js and Node.js to simulate real-world tech interviews.
- Integrated AI APIs to analyze user responses dynamically, providing real-time, actionable feedback on technical accuracy and communication skills.
- Built a responsive and interactive user dashboard using Tailwind CSS to track interview performance and progress over time.
- Secured backend endpoints and managed user data and conversation history efficiently using Express.js and MongoDB.

3. National Auto Sales - Bajaj Dealership Platform (MERN Stack) [Live Demo](#) | [GitHub Code](#)

- Developed a full-stack, real-world automobile sales website for a Bajaj Auto agency to digitize their vehicle inventory.
- Implemented dynamic vehicle listings with detailed specifications, pricing, and a responsive user enquiry functionality.

- Built a highly responsive UI using React.js and Tailwind CSS for a seamless user experience across all devices.
- Built scalable RESTful APIs in Node.js/Express.js and deployed the frontend application using Vercel and the backend using Render.

4. Weightloss & Nutrition Clinic Website (MERN Stack) [Live Demo](#) | [GitHub Code](#)

- Designed and developed a professional web presence for a weight-loss specialist to increase patient reach and online bookings.
- Implemented interactive features such as dynamic diet plan showcases and a streamlined appointment booking UI.
- Created a seamless, mobile-first user experience using React.js and Tailwind CSS.
- Managed backend data flow for patient inquiries securely using Node.js and MongoDB.

5. UrbanGreens - Online Grocery Store (MERN Stack) [Live Demo](#) | [GitHub Code](#)

- Developed a fully functional online grocery store management system featuring dynamic product categories, a shopping cart, and secure user authentication.
- Implemented a secure checkout flow and real-time payment processing by integrating the Razorpay payment gateway.
- Built robust RESTful APIs using Node.js and Express.js for seamless inventory, cart, and order management.
- Integrated MongoDB for secure and efficient database management of users and transaction records.

STRENGTHS

- Strong analytical and problem-solving abilities
- Quick learner and highly adaptable to new technologies
- Solid understanding of UI/UX principles and responsive design
- Effective communication and collaboration skills

PERSONAL DETAILS

- **Date of Birth:** 17/03/2003
- **Languages:** Hindi, English
- **Hobbies:** Coding, Learning new tech stacks, Reading tech blogs
